View system details

View inventory details

The **Inventory** widget provides you with a rollup of the total systems that you own. This includes both Active IQ enabled and non-enabled products.

You can also generate the report of the selected watchlist and email the report to a maximum of 5 recipients.

Steps

1. In the **Inventory** widget, click **Systems** to view the system information of all platforms or click the platform type and then click **Systems** to view systems specific to that platform.
2. Click the node or cluster to view detailed information about the system.
3. Download the **Inventory** report to view the system details in .xls format.
4. Download the **Ansible Inventory** report to view the system details in the .yml and .ini formats at the region or site level.

   The Ansible Inventory files can be used with customized Ansible Playbook files to make infrastructure configuration changes.

View valuable insights

The **Valuable Insights** widget provides information about the number of support cases, pending software upgrades, storage efficiency savings, risks mitigated, and others. It also proactively lists the risk notifications from the **Wellness** attribute.

Steps

1. In the **Inventory** widget, click **Systems** to view the system information of all platforms or click the platform type and then click **Systems** to view systems specific to that platform.
2. Click the node or cluster to view detailed information about the system.

   The **Valuable Insights** widget is available on the dashboard.

3. Review the information in the widget to understand the business and technical value received from your support contract.

View capacity utilization with NetApp Keystone Flex Subscription

If you are subscribed to Keystone Flex Subscription Service, you can view the Flex Subscription widget on the Active IQ Digital Advisor Dashboard.

The Flex Subscription widget provides you a summary of the capacity usage for your account. It consists of capacity utilization charts with respect to the logical capacity, the snapshot being rounded up to the last five minutes. The utilization over and above the committed capacity (the burst capacity) is marked in red.

You can view the **Keystone - Capacity Utilization** dashboard, which analyzes the data in the widget and graphically represents the utilization trend of the capacity and usage for all the subscribed storage services tiers, such as premium, extreme, and standard, associated with your NetApp Keystone Flex Subscription account.

You can view the Flex Subscription service capacity and usage of each subscribed service for your block, file services, or object storage on the dashboard.

As an Active IQ user, you can choose between ONTAP Collector and AutoSupport to obtain data on your capacity usage.

Steps

1. Click **View Details** to view the utilization trend in the detailed **Keystone - Capacity Utilization** dashboard.
2. Select either 30 days, 7 days, or 1 day to view the recent average usage trend.
3. Optionally, if you have opted for ONTAP Collector to obtain data on your capacity usage, you can click through the tabs on the dashboard to view more details about your file shares and disks.

   Click **Shares** or **Disks** to identify the file shares or disks nearing the committed capacity and make informed decisions to save storage capacity.
